

SUTD MECHANICAL DESIGNER CLUB

WHO ARE WE?

As a club we aim to gather, grow and inspire students interested in mechanical design in SUTD. We hope to help mechanical designers to develop their passion and skills to collaborate on amazing and inconceivable projects that push beyond the limits.

WHAT DO WE DO?

Our main activities include workshops for SolidWorks and Autodesk Fusion360 for all students in SUTD. We also organise 3D Modelling competitions and certification exams for both SolidWorks and Autodesk Fusion360.

WHY SHOULD YOU JOIN?

Our members enjoy discount and priority for our workshops. On top of that, members also get subsidies on examinations for professional certifications such as Certified SolidWorks Associate and Fusion360 Certification. Our members also have the chance to become instructors to share their skills with their peers attending the workshops.
