## SUTD GUNPLA

### WHO WE ARE

SUTD Gunpla Club is a group of students passionate in building and assembling custom plastic models. While the club's main focus continues to be gunpla, we welcome all builders and crafters who are interested in plastic models, be it mecha, military models or figurines, and those who have no experience are welcome to join us as well!

### WHAT WE DO

We pride ourselves as being specialists. Each member has their own interests as well as specific skills unique to themselves. Gunpla club offers members to opportunity to share their knowledge and gain more from other members as well. From CADding, crafting, airbrushing and 3D printing, everyone's skills come together to make projects such as large scale models and dioramas come to life

### GUNPLA CLUB HIGHLIGHTS

SUTD Gunpla Club is proud to be sponsored by Toymana. The club receives monthly kits to be reviewed, which can be found on our Facebook page. We also encourage our members to explore their interests and take up projects. They can help out wherever they can to make the project a success. Some of our more recent works are below.
