

ENERGY CLUB

Founded in 2015, our club focuses on green technology projects. From solar-powered devices to LED circuits, we encourage SUTD students to pick up tinkering skills through our mini projects called Tinker Day, UROPs and our yearly hackathon, Energy Camp!

SUTD Energy Club

Energy Club is especially relevant for those going to EPD, but we also open our group chat to anyone who have questions about their personal or academic projects!

Pssst...! We have a lot of materials to go by! If you want to pursue a personal or research project related to energy, feel free to contact us!
